Volume 408, numbers 1,2,3,4 **11 September 1997**

Contents

Instructions to authors v

Nuclei

Photodisintegration of the three-nucleon systems and their polarizabilities
V.D. Efros, W. Leidemann and G. Orlandini 1

A deep optical potential and gross resonant structures in low energy $^{16}O + ^{12}C$ scattering
C. Gao and Y. Kondō 7

Virtual pion scattering
M.A. Kagarlis and V.F. Dmitriev 12

Exchange currents in photoproduction of baryon resonances
U. Meyer, A.J. Buchmann and A. Faessler 19

Narrow πNN resonance
A. Matsuyama 25

Charge distributions in multifragmentation indicating the nuclear liquid-gas phase-transition?
A.S. Botvina and D.H.E. Gross 31

Self-consistent description of the excited superdeformed bands in ^{191}Hg
A. Villafranca and J.L. Egido 35

***K*-forbidden transitions from multi-quasiparticle states**
P.M. Walker et al. 42

Particles and fields

Anisotropy of the cosmic background radiation implies the violation of the strong energy condition in Bianchi type I universe
T. Chiba, S. Mukohyama and T. Nakamura 47

An alternative approach to quantized fields in Rindler space
R.D. Daniels 52

Ruling out a critical density baryonic universe
M. Birkel and S. Sarkar 59

Has cosmological dark matter been observed?
M. Salgado, D. Sudarsky and H. Quevedo 69

Gravitational phase transition of fermionic matter
N. Bilić and R.D. Viollier 75

Cosmic string zero modes and multiple phase transitions
S.C. Davis, A.-C. Davis and W.B. Perkins 81

Can string theory avoid cosmological singularities?
S. Kalyana Rama 91

New theories in six dimensions and matrix description of M-theory on T^5 and T^5/Z_2
N. Seiberg 98

Matrix description of M-theory on T^4 and T^5
M. Berkooz, M. Rozali and N. Seiberg 105

Instantons, scale invariance and Lorentz invariance in matrix theory
T. Banks, W. Fischler, N. Seiberg and L. Susskind 111

Multidimensional Calogero systems from matrix models
A.P. Polychronakos 117

D-instantons, strings and M-theory
M.B. Green and P. Vanhove 122

On the equivalence of different formulations of the M theory five-brane
I. Bandos, K. Lechner, A. Nurmagambetov, P. Pasti, D. Sorokin and M. Tonin 135

Open supermembranes in eleven dimensions
Ph. Brax and J. Mourad 142

Opening of branes
R. Argurio, F. Englert, L. Houart and P. Windey 151

PHYSICS LETTERS B

Volume 408, numbers 1,2,3,4 **11 September 1997**

Contents

(Continued from page 4 of cover)

Point-like structure in strings and non-commutative geometry
F. Ardalan and A.H. Fatollahi 157

On the compactification of type IIA string theory
J. Maharana and H. Singh 164

Phenomenology of 3-family grand unified string models
Z. Kakushadze, G. Shiu, S.-H.H. Tye and Y. Vtorov-Karevsky 173

Counting closed string states in a box
M. Laucelli Meana, M.A.R. Osorio and J. Puente Peñalba 183

Form-factors of exponential fields in the affine $A^{(1)}_{N-1}$ Toda model
S. Lukyanov 192

Potentials and T-duality
S.F. Hewson and N.D. Lambert 201

Mass hierarchy from compositeness hierarchy in supersymmetric gauge theory
M. Hayakawa 207

Instantons, higher-derivative terms, and nonrenormalization theorems in supersymmetric gauge theories
N. Dorey, V.V. Khoze, M.P. Mattis, M.J. Slater and W.A. Weir 213

Recognizing superpartners at LEP
G.L. Kane and G. Mahlon 222

Chargino production at an e^-e^- collider
J. Gluza and T. Wöhrmann 229

Second class constraints in a higher-order Lagrangian formalism
I.A. Batalin, K. Bering and P.H. Damgaard 235

Generalized stochastic gauge fixing
H. Hüffel and G. Kelnhofer 241

Fermionic sign cancellations in the continuous renormalization group equation
M. Salmhofer 245

Pursuing the strange stop interpretation of the HERA large-Q^2 data
J. Ellis, S. Lola and K. Sridhar 252

Implications of a charged-current anomaly at HERA
K.S. Babu, C. Kolda and J. March-Russell 261

Modified parton distributions and the HERA high-Q^2 anomaly
K.S. Babu, C. Kolda and J. March-Russell 268

Enhanced production of events at large x and Q^2 at HERA and the meson cloud in the nucleon
A. Szczurek and A. Budzanowski 275

e^+e^- annihilation into hadrons at LEP2 in the presence of the anomalous DESY positron-jet event phenomenon
S. Jadach, B.F.L. Ward and Z. Wąs 281

Contact interaction explanation of HERA events and $SU(3)_C \times SU(2)_L \times U(1)_Y$ invariance
N.G. Deshpande, B. Dutta and X.-G. He 288

Coupled critical models: application to Ising-Potts models
P. Simon 293

Further discussions on a possible lattice chiral gauge theory
S.-S. Xue 299

Γ spectrum from NRQCD with improved action
UKQCD Collaboration 308

(Continued on preceding page)

PHYSICS LETTERS B

Volume 408, numbers 1,2,3,4 **11 September 1997**

Contents

(Continued from following page)

Field strength correlators in full QCD
M. D'Elia, A. Di Giacomo and E. Meggiolaro 315

Complete QCD corrections of order $O(\alpha_s^3)$ to the hadronic Higgs decay
K.G. Chetyrkin and M. Steinhauser 320

Higgs boson search at photon collider for $M_H = 140$–190 GeV
I.F. Ginzburg and I.P. Ivanov 325

Estimating the effects of Bose-Einstein correlations on the W mass measurement at LEP2
V. Kartvelishvili, R. Kvatadze and R. Møller 331

On the QCD sum rule determination of the strange quark mass
P. Colangelo, F. De Fazio, G. Nardulli and N. Paver 340

Examination of Wandzura-Wilczek relation for $g_2(x,Q^2)$ in pQCD
A. Harindranath and W.-M. Zhang 347

Slope of the Isgur-Wise function in the heavy mass limit of quark models à la Bakamjian-Thomas
V. Morénas, A. Le Yaouanc, L. Oliver, O. Pène and J.-C. Raynal 357

***R*-parity violation and semileptonic decays of *B*-meson**
J.-H. Jang, Y.G. Kim and J.S. Lee 367

Kinematic enhancement of non-perturbative corrections to quarkonium production
M. Beneke, I.Z. Rothstein and M.B. Wise 373

Strange vector currents and the OZI-rule
U.-G. Meißner, V. Mull, J. Speth and J.W. Van Orden 381

Strange magnetic moment and isospin symmetry breaking
B.-Q. Ma 387

Q^2-evolution of g_1 for nucleon in the resonance region
Y.-b. Dong 393

Is there anomalous J/ψ suppression in present-day heavy-ion collisions?
R.V. Gavai and S. Gupta 397

Renormalons in the effective potential of the vectorial $(\phi^2)^2$ model
L. Galli and I. Scimemi 403

Production associated to rare events in high energy hadron–hadron collisions
J. Dias de Deus, C. Pajares and C.A. Salgado 417

Forward–backward multiplicity correlation in e^+e^- collisions at 91 GeV and 133 GeV
L.K. Chen, D. Kiang and C.K. Chew 422

Diffraction in deep inelastic scattering: the hadronic nature of quarks
L. Dick, V. Karapetian, R. Barni and G. Preparata 427

The $\gamma^*\pi^0 \to \gamma$ form factor
M.A. Ivanov and V.E. Lyubovitskij 435

Search for non-paulian transitions in ^{23}Na and ^{127}I
R. Bernabei et al. 439

Experimental search for the decay mode $K_L \to \pi^+\pi^-e^+e^-$
T. Nomura et al. 445

Cross section of hadron production in $\gamma\gamma$ collisions at LEP
L3 Collaboration 450

PHYSICS LETTERS B

Volume 408, numbers 1,2,3,4 11 September 1997

Contents

(Continued from following page)

The thermal detection efficiency for recoils induced by low energy nuclear reactions, neutrinos or weakly interacting massive particles
A. Alessandrello et al. 465

Search for the flavour-changing neutral-current decay $D^0 \to \mu^+ \mu^-$
BEATRICE Collaboration 469

Spin-parity analysis of the final state $\pi^+ \pi^- \pi^0$ from $\bar{p}p$ annihilation at rest in hydrogen targets at three densities
OBELIX Collaboration 476

Confirmation of a soft photon signal in excess of Q.E.D. expectations in π^-p interactions at 280 GeV/c
A. Belogianni et al. 487

Cumulative author index to volumes 401–408 493
